

Website module - Edit page

Page editing on frontend, to have a WYSIWYG.

Layout: choose from the layouts from the template. Button only available if clicked on Edit and the template contains multiple layouts

Top bar is only displayed when someone has been logged in and has access to edit this item

Please notice that changes to this page will apply to all news items.

Warning when editing a content type item is displayed instead of the title

Normal (working) site navigation. "Add navigation item" is an extra navigation item

Page content for content type pages and transactional pages. Block is needed to position this content.

Click on Edit in the WYSIWYG editor will show a WYSIWYG toolbar and save button.

On out focus

Toolbar, should be nice in every design.

<-> drag/drop the block

Edit Edit the block (or delete)

+ to add new block, or divide into columns

WYSIWYG editor

Blocks are draggable to change the order within a column

You can change the number and width of columns
